

Oil-free compressed air for medical and laboratory applications

With oil-free compressors from Dürr Technik you can generate high-quality compressed air for highly sensitive applications

# Experience counts

Whether in a hospital, clinic or doctor's practice – clean, dry and continuously supplied compressed air is essential in the medical sector.

With more than 75 years of experience in the dental and medical sector, Dürr Technik has comprehensive know-how and meets the particularly high demands on the availability and purity of the compressed air with special products.

Dürr Technik compressors have optimal characteristics for the use of compressed air in medicine:

### Zero oil. Zero problems.

Oil-free piston compressor technology stands for high compressed air quality (ISO 8573-1) and sustainability.

# Dry and clean

The combination of oil-free piston compressors with fine filter units and our patented membrane drying system is perfectly suited for the production of medical compressed air according to DIN ISO 7396-1.

Medical compressed air in hospitals ventilates patients, drives surgical and medical tools and instruments, supplies anesthesia systems and is part of many different treatment processes.

# High quality made in Germany

Many years of experience and a highly qualified project planning and engineering team for your customer-specific solutions.

# Reliable, quiet, compact and efficient appliances

We work according to recognised standards and fulfil numerous certifications, for example:

- DIN EN ISO 13485
- DIN EN ISO 9001
- Medical device approval in accordance with the Directive 93/42/EEC

Dürr Technik ■ Quality ■ Made in ■ Germany

# OUR PRODUCTS IN USE

# **Application examples**

- Compressed air supply for phaco devices
- Compressed air for pharmaceutical equipment
- Vacuum for suction devices
- Operation of medical tools

SICOLAB med

for highly sensitive ventilators. Certified medical device of the class IIb

### KK8 / KK15 series

Compressed air for shock wave therapy with ESWT devices

Low noise generation mechanical shock waves

# P2B-304M

3 Central compressed air supply

Compressed air system for the permanent supply of small hospitals, day clinics and joint practices

# SICOLAB

# Supply of drying and sterilisation cabinets

Drying of medical instruments with oil-free compressed air is recommended by the independent group "Arbeitskreis Instrumentenaufbereitung" (AKI)

SICOLAB mini ENDO

# Drying of endoscopes and MIC instruments

Manual drying of the endoscopy channels with filtered, oil-free compressed air. Certified Class I medical device in accordance with the Directive 93/42/EEC

5

Quiet and clean compressed air supply in accordance with Directive 93/42/EEC

Further information can be found online on our website

# WE PUT PRESSURE IN THE LABORATORY

Laboratories today are equipped with a variety of measuring devices, tools and instruments. They are used, among other things, for pharmaceutical, chemical or medical examinations and analyses, experiments and quality controls. Many applications require high-quality oil-free compressed air.

## Zero oil. Zero problems.

Oil-free compressors are an advantage for reliable operation of instruments and measuring devices as well as reliable results. Oil vapors damage valves, obstruct nozzles and contaminate or distort measurement results.

### Quiet and compact

Space-saving design for use directly at the workplace. Extremely quiet due to special sound insulation.

### Economical & low-maintenance

thanks to efficient design and to

### High quality made in Germany

The compressors from Dürr Technik supply compressed air with air quality up to class 1:3:1 (ISO 8573-1). For this reason, they are ideally suited for sensitive laboratory applications.

## Dry compressed air

is due to the use of a patented membrane dryer.

# LABORATORY

Space-saving and quiet, the oil-free compact units from Dürr Technik bring high-quality compressed air into your laboratory

> Dürr Technik ■ Quality ■ Made in Germany

# OUR PRODUCTS IN USE

# Application examples

Compressed air for

- Auto-samplers
- Blood analysis
- CO<sub>2</sub>, DSC, COT analysis
- Dosage devices
- ELSD detectors
- Foodstuff inspection

SICOLAB

Compressed air for gas chromatography and LC-MS analysis

For the analysis of chemical components

Compressed air for particle measurement and shape analysis
For the analysis of particle properties

3 Compressed air for rheometers

For the analysis of the viscosity of liquids

# Laboratory

Further information can be found online on our website

4 Nitrogen generator for LC-MS analysis On-site production of nitrogen of the highest

nitrogen quality

Compressed air for analytical instruments such as spectroscopes Constant and dry compressed air supply as working medium

6 Vacuum for vacuum furnace Optimum vacuum for fast and gentle

drying of temperature-sensitive materials

7 Central compressed air supply

Compressed air system for the permanent supply of medium-sized laboratories

The right solution for every application

# **SICOLAB** Silent. Compact. Mobile.

Noise at the workplace disturbs concentration and can make you ill. The quiet, low-vibration SICOLAB provides pleasant working conditions in the laboratory and practice.

The compressor station practically disappears under the laboratory table and finds the necessary space even in small rooms.

## Advantages

- Compact to fit under the lab desk
- Adjustable outlet pressure simply set the desired pressure up to 8 bar
- Endurance designed to run at 100% duty-cycle
- Automatic condensate evaporator – elimination of manual drainage
- Air tank with anti-bacterial and anti-corrosion coating
- Secondary rear panel outlet connec-
- Maintenance-free except easy-toreplace filter

# Don't let them stress you out

With its particularly low sound pressure level, SICOLAB is the ideal compressed air station for use in laboratories and practices. High performance in whisper mode

Swivel castors and carrying handles ensure mobility, and thanks to plug-and-play the station is ready for use everywhere

#### Keep all options open

- Integrated membrane dryer 100% duty-cycle (optional)
- Fine filter (optional) filtration grade 0.01 µm
- Activated carbon filter (optional) removes odor and other impurities from the compressed air

# SICOLAB mini SICOLAB mini ENDO Class I Medical Device in accordance with 93/42/EEC

The compact SICOLAB mini models are light-weight and portable. The oil-free, ready-to-connect compressor unit is built into a ventilated sound insulation box and offers maximum flexibility with minimum maintenance.

The SICOLAB mini ENDO model is particularly suitable for drying endoscopes and is preset at 1 bar to protect highly sensitive equipment parts.

# Advantages

- Oil-free plug-and-play compressor unit ready for connection
- Compact dimensions
- Maintenance-free (except filter exchange)
- Extremely quiet
- 100% duty-cycle

#### SICOLAB mini ENDO

- Class I Medical Device in accordance with 93/42/EEC
- Comes as standard with fine filter, compressed
- air hose and stainless steel compressed air pistol Various optional attachments for other applications

#### Simple operation On and off switch

- Quick coupling
- Readable working pressure

#### Ready for use anywhere

- Light-weight, plug-and-play device
- Carrying handles

# SICOLAB med Class IIb Medical Device in accordance with 93/42/EEC

SICOLAB med provides compressed air to supply ventilators. Our compressors for ventilators can be used as either a standby device or directly as the main air supply for the ventilator.

Medical devices must meet strict standards to ensure patient safety and product integrity. Our SICOLAB med has the necessary certification as a Class IIb medical device, in accordance with the 93/42/EEC directive.

The generated quality of compressed

### Advantages

- Very quiet with 47 dB (A)
- Dry air through the integrated membrane dryer
- High filtration efficiency thanks to three filtration steps up to max. 0.3 μm
- Automatic condensate evaporation (no manual emptying of the condensate necessary)
- Pressure control for an even, energy efficient operation

#### SICOLAB med

# Oil-free compressor stations ready for connection

You have the choice: In addition to our standard equipment, Dürr Technik offers the possibility of developing customized compressor designs especially for your application together with our specialized project planning and development engineers.

Our diverse product range with ready-to-connect compressor stations are available with a membrane dryer, DürrTronic, sound-insulated housing or as a mobile unit mounted on a robust stainless steel frame with a foldable handle for convenient handling.

We use high-quality pressure vessels from 3 to 90 litres. Compressor stations are available from 25 - 860 l/min at 5 bar pressure.

#### Compressor stations

# DürrTronic – electronic control and monitoring

DürrTronic monitors your compressor station for safe and reliable operation.

The electronic control system controls the function of the system and ensures the effective condensate management. The automatic monitoring shows the most important operating parameters and preformance statistics, providing warns if there is a high frequency of switching cycles and it shows the optimal time for the replacement of components and thus ensures an optimum service life of the system.

#### DürrTronic

Further information can be found online on our website

# Compressed air quality – dry and clean

The quality of compressed air in hospitals, practices and laboratories is of great importance. The ISO 8573-1:2010 standard (compressed air class) classifies the quality and purity of compressed air in the following three categories: Oil content, moisture and solid particles.

The compressors from Dürr Technik supply oil-free compressed air with air quality up to class 1:3:1. For this reason, they are ideally suited for sensitive laboratory and medical applications.

### Patented membrane drying

The Dürr Technik membrane drying plant supplies dry and clean air. The membrane dryers are very convinant and have an economical purge (low consumption) which gives 100% availability in continuous operation.

### Advantages

- Dry air protects sensitive instruments, promotes their value retention and ensures hygienic conditions. Measurement results are not falsified
- Maintenance-free, except annual filter exchange

Performance comparison of one-chamber drying systems and membrane dryers

<sup>\*\* 1:-:-</sup> with optional fine filter 0.01 um -:-: 1 in oil-free environment

## Completely carefree with Dürr Technik
